

Open Position

Senior Software Engineer - Architect / Backend (m/w/d) – Full Time – in Munich / Greater Munich

Your Tasks

As our Software Architect and Senior Engineer (Backend) you will have a lead role in our development core team to build the extensible infrastructure on various cloud services that will be the backbone of our IoT solution for medical diagnostics.

- Build a highly-scalable cloud application to unlock access to a world of IoT devices and to enable our quality surveillance services
- Lead the development and delivery of cloud services with solid engineering and infrastructure
- Work closely with the management team and front-end engineers to explore new possibilities in cloud development
- Collaborate with other members of software and hardware engineering team to build the backend APIs that powers the web applications
- Implement and maintain a secure and highly-scalable application using industry's best practices
- Work in accordance with our Quality Management System

Requirements

- A degree in computer science / software engineering or a related field
- Min. 3 years of working experience in comparable areas, experience in development of medical software a big plus
- Proven experience with Node.js, Python, Django, Docker, git
- Experience with cloud services (e.g. Azure) and database management
- Solid understanding of fundamental software engineering principles and application architectures as well as solid understanding of OOP design and principles
- Experience with test-driven, agile development principles and release management
- You have an affinity for DevOps; developing products with world-class stability and taking care of your creation is a passion for you
- Self-responsible personality, creativity and excellent communication skills
- Very good knowledge of German (min. C1) and knowledge of English (min. B2)
