

Open Position

Senior Software Engineer – Frontend UI/UX design (m/w/d) – Full Time – in Munich / Greater Munich

Your Tasks

As Frontend engineer you will be part of our core development team to design and build the user interface that provides the unique experience of our IoT solution for medical diagnostics. We are looking for a Front-End Web Developer capable of driving our dashboard development from UI/UX design to implementation.

- Design and implement build a highly-scalable cloud application to unlock access to a world of IoT data and to enable our quality surveillance services
- Participate in the development of concepts and architecture of the frontend interfaces with emphasis on usability, performance, security and long-term maintainability
- Work closely with the management team and engineers to bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.
- Implement and maintain a secure and highly-scalable UI/UX based on our REST API using industry's best practices
- Write both unit and integration tests and work in accordance with our Quality Management System

Requirements

- A degree in computer science / software engineering or a related field
- Min. 2 years of work experience; experience with development of medical products (nice to have)
- Proven experience with Javascript, HTML5, XML, JSON, Docker, git
- Experience with test-driven development and agile development principles
- Creativity and excellent communication skills
- Very good knowledge of German (min. C1) and knowledge of English (min. B2)
